Submission to Kerry County Council Draft Development plan.

At a recent meeting of Cromane Community Council it was agreed that the following matters were of the utmost importance to our community.

1. In relation to section K.C.D.P 11.46

In the Cromane Socio-Economic development plan the provision of a landing facility together with the necessary infrastructure for that facility was identified as the number one objective for our maritime community.

2. In relation to section 11-50 & 51

There has been no maintenance of our sea defences in the Cromane area for years. The existing embankments have been breached in many areas and there is widespread flooding at high tides. These structures need to be repaired and upgraded as a matter of urgency. Several homes are in immediate danger.

Sincerely,

Liam Hayes.
