

~~B~~ Planning CoBundies.

I wish to object to the policies put forward in the Draft County Development Plan in relation to wind energy. Kerry has made a substantial contribution towards meeting national renewable energy target as it generates 18% of the National wind generation total. Kerry has a county has done its bit with regards to wind energy. No further Wind Development Areas should be identified in the new County Development Plan as Kerry as a county has done its fair share in meeting the Nation's climate change obligations.
