

I Found your webinar good, but too long in one segment. I have found your survey impossible to navigate, so I write you instead.

1. Re introduce Water Rates, or household rate for domestic properties... We cannot have a service without it being funded. No one WANTS to pay a 'charge' but impossible to avoid, long term. This I presume will be ignored by you.
2. Bring life and families/individuals back into towns. Give allowances to business property owners, and make it compulsory to use UPSTAIRS for accommodation, in ALL towns.
3. Make road cycle lanes, safer for cyclists, with kerb divider where lane is provided.
4. Tralee Town. Make navigation around town, user friendly. How would a visitor get around Tralee, when for us locals, its a nightmare.
5. With CSO information, place charge on properties which are unused for over one year. Then if still unused, increase the fine, each year. One quarter are said to be 'empty'.
6. Put more emphasis on coastal erosion.
7. With current budget, I believe Kerry County Council - in general - do an excellent job.
8. Set up an advisory panel of citizens (over 18 years of age) to re view any /all aspects of County development, every year. Not only those with vested interest, job blogs, also/rotational.
9. LISTED BUILDINGS; This aspect of PLANNING should be re visited. Is it fit for purpose.?
10. Any objection to a planning application, can only be entertained if the objector resides within 5k of property under consideration. To STOP serial objectors.

Overall, I believe Kerrycoco, do an excellent job, along with Urban Councils „juggling many many, and varied tasks. My Thanks, for a job well done.

Yours faithfully

Liam Geary
